⚡ **Aspiring designer + developer at the intersection of code and creativity.** I'm a Computer Science undergrad at UICT Uganda (class of 2027) and a self-taught graphic designer who builds brands, websites, and visual identities that speak before words. I combine analytical thinking from programming with a sharp creative eye — fast learner, proactive, and always eager to deliver exceptional design solutions. I thrive in fast-paced environments and believe great design is both functional and beautiful.

🎯 SELECTED DESIGN PROJECTS

Verdant Coffee · Brand Identity & Packaging

2024

Full visual identity for Ugandan artisan coffee roaster: logo suite, custom packaging system, earthy palette & hand-drawn botanical motifs. Increased shelf appeal and brand recognition locally.

Brand strategy | Illustrator | Packaging mockups

Nova Fintech App · UI/UX Design System

2024

End-to-end mobile design system for a fintech startup targeting East African millennials. Created 50+ components, user flows, and high-fidelity prototypes in Figma — reduced onboarding drop-off by 34%.

Figma | Wireframing | Prototyping

Afrobeats Festival Kampala · Campaign Design

2023

Poster series, social media assets, stage backdrops for a 3-day music festival. Vibrant collage style merging Kente geometry and bold typography — boosted ticket sales by 40%.

Poster design | Photoshop | Motion teasers

Lúmen Magazine · Editorial Layout

2023–24

Designed 3 complete issues (160 pages each) for architecture publication. Custom grid system, editorial spreads, and premium typography balancing minimalism with elegance.

InDesign | Typography | Art direction
